

STATE OF LOUISIANA  
OFFICE OF CONSERVATION  
BATON ROUGE, LOUISIANA

August 18, 2008

ORDER NO. 990-B-100

Order concerning permission to drill, designate and utilize three  
(3) alternate unit wells for **CV RB SUBB** in the  
**WOODARDVILLE FIELD**, Bienville Parish, Louisiana.

\*\*\*\*\*

Pursuant to power delegated under the laws of the State of Louisiana, and particularly Title 30 of the Louisiana Revised Statutes of 1950, and after a public hearing held under **Docket No. 08-1079** in Baton Rouge, Louisiana, on **July 15, 2008**, upon the application of **QUESTAR EXPLORATION AND PRODUCTION COMPANY**, following legal publication of notice and notice in accordance with the rules prescribed by the Commissioner of Conservation, the following Order is issued and promulgated by the Commissioner of Conservation as being reasonably necessary to conserve the natural resources of the State, to prevent waste as defined by law, to avoid the drilling of unnecessary wells, and otherwise to carry out the provisions of the laws of this State.

DEFINITION

The Cotton Valley Formation, Reservoir B, in the Woodardville Field, Bienville and Red River Parishes, Louisiana, was defined in Office of Conservation Order No. 990-B, effective September 13, 2005.

FINDINGS

The Commissioner of Conservation finds as follows:

1. That Office of Conservation Order No. 990-B, effective September 13, 2005, as amended and supplemented by the 990-B Series of Orders, established rules and regulations and created drilling and production units for the exploration for and production of gas and condensate from the Cotton Valley Formation, Reservoir B, in the Woodardville Field, Bienville and Red River Parishes, Louisiana, including the unit designated CV RB SUBB.
2. That there is a market and demand for additional deliverability from CV RB SUBB and three (3) alternate unit wells on said unit will increase deliverability from the unit and afford the opportunity to recover hydrocarbons which cannot be recovered from any other well located within such unit.
3. That the available geological, engineering or other appropriate information indicates that it would be reasonable and in the interest of conservation to permit the applicant to drill, designate and utilize three (3) alternate unit wells for CV RB SUBB at the locations shown on the plat labeled, "Questar Exploration and Production Company - Exhibit No. 1 for Docket Nos. 08-1078 and 08-1079", a copy of which is attached hereto.
4. That the operator of CV RB SUBB should be allowed to produce the unit allowable from the unit well, the alternate unit wells or from any combination of such wells, at the discretion of the operator.

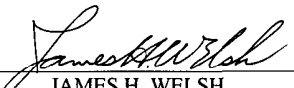

**ORDER**

NOW, THEREFORE, IT IS ORDERED THAT:

1. Questar Exploration and Production Company be and is hereby authorized to drill, designate and utilize three (3) alternate unit wells for CV RB SUBB, at the locations shown on the plat labeled, "Questar Exploration and Production Company - Exhibit No. 1 for Docket Nos. 08-1078 and 08-1079", a copy of which is attached hereto and made a part hereof.
2. The operator of CV RB SUBB is hereby authorized to produce the unit allowable in accordance with Finding No. 4 hereof.
3. Except to the extent contrary herewith, the provisions of Office of Conservation Order No. 990-B, effective September 13, 2005, as amended and supplemented by the 990-B Series of Orders, shall remain in full force and effect.

This Order shall be effective on and after July 15, 2008.
